

IF THE WINEMAKER
*Wants a very delicate,
 grapey wine, he will take
 every precaution to keep
 oxygen away from it at every
 stage. In ancient Rome, air
 was kept from wine in a
 bottle by a layer of oil on the
 top.*

THOMAS JEFFERSON,
*wine connoisseur and would-
 be wine grower, promoted
 wine as the best means of
 combating Intemperance.*

WHEN STORING
*Wine, the ideal temperature
 is 50°F. At this degree,
 white wines will stay cool
 enough for serving, while
 reds will mature slowly but
 steadily.*

RED WINES
*Extract all their color from a
 period of contact between
 the juice and skins after
 crushing. In general, white
 wines are removed quickly
 from their skins to avoid any
 coloration.*

EVER WONDER
*What those big display
 bottles are called?*
Magnum: 2 btls
Jeroboam: 4 btls
Rehoboam: 6 btls
Imperiale: 8 btls
Balthazar: 16 btls
Nebuchadnezzar: 20btls

*Vintages are subject to
 change due to product
 availability.*

WHY CORK

for a wine plug? It's light, clean and almost impermeable. It's smooth, yet stays firmly in position in the neck. It doesn't expand or contract with changes in temperature, rarely rots and doesn't burn easily.

CORK IS

the outer bark of the cork oak tree, which grows most abundantly in Spain and Portugal. Before it is harvested, a cork tree must grow for 20 years; then the bark can be stripped about once every decade.

ONCE IN POSITION,

a good cork will last at least 25 years and sometimes as long as 50 years, although the best cellars will re-cork their old vintages at 25-year intervals.

"The soft extractive note

of an aged cork being withdrawn has the true sound of a man opening his heart."

- William S. Benwell,

"Wine ... offers a greater

range for enjoyment and appreciation than possibly any other purely sensory thing which may be purchased."

- Ernest Hemingway
